Autopsy Tissue Needs

Laboratory of Nalin Gupta, M.D., Ph.D
University of California, San Francisco

Research Interests

Our research interests include fundamental mechanisms of brain tumor progression and defining the biological response of tumors to various treatment strategies. Currently, our laboratory is focusing on cell-cell interactions during tumor progression, and the special role of pro-inflammatory cytokines.

Selected publications

Liang, Yu, Andrew W. Bollen, and Nalin Gupta. "CC Chemokine Receptor-2A Is Frequently Overexpressed in Glioblastoma. *Journal of Neuro-Oncology* 86 no. 2 (January 2008): 153-63.

Liang, Yu, Maximilian Diehn, Andrew W. Bollen, Mark A. Israel, and Nalin Gupta. "Type I Collagen Is Overexpressed in Medulloblastoma as a Component of Tumor Microenvironment." *Journal of Neuro-Oncology* 86 no. 2 (January 2008): 133-41.

Dinca, Eduard B., Jann N. Sarkaria, Mark A. Schroeder, Brett L. Carlson, Ramona Voicu, Nalin Gupta, Mitchel S. Berger, and Charles D. James. "Bioluminescence Monitoring of Intracranial Glioblastoma Xenograft: Response to Primary and Salvage Temozolomide Therapy. *Journal of Neurosurgery* 107 no. 3 (2007): 610-16.

Liang, Yu, Andrew W. Bollen, Ken D. Aldape, and Nalin Gupta. "Nuclear FABP7 Immunoreactivity Is Preferentially Expressed in Infiltrative Glioma and Is Associated with Poor Prognosis in EGFR-Overexpressing Glioblastoma." *BMC Cancer* 6 no. 97 (April 19, 2006).

Autopsy Tissue Needed

We are seeking frozen and/or paraffin-embedded tissues for the following diagnoses: brain-stem glioma, medulloblastoma, and ependymoma.
